Announcement Regarding the Purchase and Cancellation of Own Shares (First Series Class Three Preferred Shares) and the Partial Repayment of Public Funds

Resona Holdings, Inc. (“Resona Holdings”) hereby announces that it has decided today to acquire part of the First Series Class Three Preferred Shares held by the Deposit Insurance Corporation of Japan in relation to the injection of public funds in the past as its own shares (the “Acquisition of Preferred Shares”), as part of the “Public Funds Full Repayment Plan” formulated on May 10, 2013 (for details of this plan, please see the “On Formulation of the ‘Public Funds Full Repayment Plan’” disclosed on the same day (May 10, 2013)), and approval therefor has been obtained from the relevant authorities. The shares (the First Series Class Three Preferred Shares) to be acquired through the Acquisition of Preferred Shares will be cancelled immediately after the acquisition.

With the Acquisition of Preferred Shares, the acquisition of own shares based on the threshold for acquisition of own shares established for the First Series Class Three Preferred Shares pursuant to the resolution of the Board of Directors on May 10, 2013, will have been completed.

Note

1. Grounds for Implementation of the Acquisition of Own Shares

The Acquisition of Preferred Shares is implemented for purposes such as to securely progress the “Public Funds Full Repayment Plan” formulated on May 10, 2013 by realizing an early repayment of the public funds it received pursuant to the Deposit Insurance Act, without causing a burden on citizens. Resona Holdings has made a request today to the Deposit Insurance Corporation of Japan to sell a part of the First Series Class Three Preferred Shares (127,000,000 shares) held by it pursuant to the Deposit Insurance Act, and Resona Holdings has received approval therefor.

As a result of the Acquisition of Preferred Shares, the number of potential ordinary shares to be issued upon the conversion of the First Series Class Three Preferred Shares will be reduced by 1,649,350,649 shares (71.0% of the number of ordinary shares issued as of today) (*) at the most. Therefore, the Acquisition of Own Shares is expected to facilitate the convergence of the current share valuation, which may vary depending on whether and how the dilution risk is considered in relation to the potential ordinary shares.

(*) Calculated based on the floor exchange price of 154 yen which is effective as of today. If calculated based on the exchange price of 484 yen applicable as of today, the number of potential ordinary shares to be reduced would be 524,793,388 shares (22.6% of the number of ordinary shares issued as of today).
